DETAILED ACTION

This Office Action is responsive to the applicant's amendment filed on September 8, 2004.

Claims 1 and 15 have been amended. Overall, claims 1-20 are pending in this application.

Oath/Declaration

1. This application presents a claim for subject matter not originally claimed or embraced in the statement of the invention. Specifically, applicant has removed "a length less than twice the pitch of the helical thread" in claim 15; thus the scope of the claim is broader than the original claim. A supplemental oath or declaration is required under 37 CFR 1.67. The new oath or declaration must properly identify the application of which it is to form a part, preferably by application number and filing date in the body of the oath or declaration. See MPEP §§ 602.01 and 602.02.

Double Patenting

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 15-19 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 13-17 of U.S. Patent No. 6,719,547. Although the

Art Unit: 3748

conflicting claims are not identical, they are not patentable distinct from each other because the subject matter claimed in the instant application is fully disclosed in the patent and is covered by the patent since the patent and the application are claiming common subject matter as follows:

a housing having inlet and outlet ports;

a male rotor having a plurality of threads and having a length, a cross section of the helical thread comprising a plurality of teeth each having a first arc angle with respect to the axis and toothless sectors each having a second arc angle greater than the first arc angle, a tooth having a profile comprising a minor diameter arc and a tooth segment radially extending to a major diameter arc in close tolerance with the housing; and

a female having a plurality of helical grooves and having a length approximately equal to the male rotor, the female is rotatably mounted about a second axis and counter-rotates with respect to the male rotor and has a periphery in close tolerance with the housing; the helical threads and helical grooves form a buttress thread shape being comprised of parallel straight diagonal lines and a pair of opposing lines.

Following the rationale in *In re Goodman* cited in the preceding paragraph, where applicant has once been granted a patent containing a claim for the specific or narrower invention, applicant may not then obtain a second patent with a claim for the generic or broader invention without first submitting an appropriate terminal disclaimer. Note that since Application claims 15-19 are anticipated by Patent claims 13-17 and since anticipation is the epitome of obviousness, then Application claims 15-19 is obvious over Patent claims 13-17.

Allowable Subject Matter

3. Claims 1-14 and 20 are allowed.

Response to Arguments

Applicant's arguments with respect to claims 1-20 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
